Summary

First-year Engineering student intending to specialize in Aerospace and Electrical Engineering. Driven by a passion for mountain biking and motorsports. Combines experience and skills with Fusion 360, ANSYS Fluent, and Python. Seeking an internship to translate an enthusiasm in engineering into practical engineering experience.

Education

Bachelor of Engineering (Honours) - GPA: 5.75/7.0 — *Expected Graduation: Dec 2028*
Prospective Majors in Aerospace & Electrical Engineering — **Australian National University**

Technical Skills

- **Software & Simulation:** ANSYS Fluent (CFD), Fusion 360 (CAD).
- **Engineering & Hardware:** 3D Printing, Carbon Fiber Layup, Soldering, Circuit Analysis.
- **Programming & Tools:** Python, C++.

Experience

Formula Student Team - Aerodynamics Sub-Team — *Aug 2025 - Present*
ANUFS , Canberra
- **Design & Analysis:** CFD Analysis of individual components and the entire car using ANSYS Fluent
- **Manufacturing:** Fabricated carbon fiber bodywork and wing elements via vacuum infusion, layup, and trimming.
- **Team Collaboration:** Worked within a multidisciplinary team to meet competition deadlines and budget constraints.

Bike Mechanic (Part Time) — *Feb 2025 – Present*
Fixed By Ryan - (fixedbyryan.com)
- Servicing and building up high end mountain bikes including suspension servicing, bleeding brakes, part replacement and issue diagnosis.

Mountain Bike Coach (Contract) — *Jan 2022 – Present*
Canberra Off Road Cyclists
- Coaching groups of high level junior mountain bike racers, providing clear instruction and feedback to develop technical skills and race performance.

Bike Mechanic (Full Time) — *Apr 2024 – Sep 2024*
Summit Sports, Whistler Blackcomb, Canada
- Maintaining a high volume, high end rental bike fleet
- Diagnostic of complex issues in a timely manner

Sales & Mechanic (Full time) — *Jan 2023 – Mar 2024*
99 Bikes - Mitchell
- Bike building, servicing & tune ups
- Generated $500,000+ in Personal Sales Revenue

Academic Projects

Maze Rover — *Semester 1, 2025*
Engineering Course Project
- Developed a maze solving rover, using an Arduino, ultrasonic sensors and DC motors.

Smartphone charger design — *Semester 2, 2025*
Engineering Course Project
- Designed and soldered a full wave rectifier with smoothing to charge a smartphone.

Balsa Wood Bridge Design — *Semester 2, 2025*
Engineering Course Project
- Designed, manufactured, and validated a balsa wood bridge using structural analysis.
